# The story so far...

Bio-gen Extracts Pvt. Ltd, India, established in the year 2000, is a GMP Certified, fine chemicals company that specializes in the process development and manufacture of Active Pharmaceutical Ingredients, Therapeutic Enzymes, Specialty Polymers & Nutritional Raw Materials. Our expertise in organic synthesis, process development and a controlled supply chain enables us to provide customers with high quality Bulk Actives at competitive prices. State-of-the-art equipment and instruments give us the edge to compete globally. The infrastructure, with its optimum installed capacities and capital costs, gives us sustainable competitive cost advantage. We have superior technical & innovation capabilities courtesy our people, who have repeatedly proven their ability to rise to the challenges.

Choose Good Health™

## GARLIC EXTRACT

We have been studying active ingredients found in Organic Garlic to understand its value and possible applications for Blood-related ailments. Our studies show that the active ingredient found in garlic, 'Allicin' is highly beneficial in reducing Blood Pressure in patients with high BP. We have successfully tested several batches of our unique formulation with promising & desirable results. What interests us even more is the fact that this is a completely natural formulation with no side effects.

The focus of our studies have revolved around the lipid-lowering ability of Garlic Extract. The tests have shown significant lipid-lowering activity in the subjects at a rate faster than other ingredients that influence the lipid profiles positively. The results have been quite promising so far and favorably consistent. Further more, the test also show significant reduction in the blood-pressure of the test subjects with high BP, at a desirably quick rate. We believe that a formulation that lowers lipids to their desirable levels and also lowers high Blood Pressure and does it consistently offers valuable opportunity to anyone who desires to develop products that have these qualities independently or together.
